UK work authorisation: Graduate visa valid until July 2028

PROFILE

QA and web application tester with hands-on experience across manual, API, regression, and automated testing in a fast-paced agency environment. Work through testing tickets across WordPress sites and client CRMs, most built on Laravel, checking functionality against expected behaviour and edge cases, testing APIs with Postman, and logging and triaging bugs against agreed SLAs. Built and maintain a Playwright-based automated regression suite plus Python Slack bots that reduce recurring manual QA work. Comfortable writing test documentation, coordinating fixes to deadline, and reporting results clearly to developers and clients.

KEY SKILLS

- **Testing:** Manual Testing, Exploratory Testing, Functional Testing, Regression Testing, Cross-Browser Testing, Test Case Design, Bug Logging, Bug Triage.
- **API Testing:** Postman endpoint testing, ImmuniWeb API scanning.
- **Automation:** Playwright, Python, Git, GitHub, Bitbucket.
- **Security Testing:** Wapiti, ImmuniWeb, severity triage, remediation tracking.
- **Tools:** DoneDone, Trello, Microsoft 365, Google Workspace, WordPress, Laravel CRM.
- **Documentation:** Test Reports, User Guides, Technical Documentation, API Documentation.

EXPERIENCE

Wirebox | Web Application Tester

Watford, UK | Sep 2024 to Present

- Work through daily testing tickets across WordPress sites and client CRMs, most built on Laravel, checking functionality against expected behaviour and edge cases.
- Test API endpoints with Postman and run API security scanning with ImmuniWeb.
- Built and maintain a Playwright-based automated regression suite covering authentication, CRUD operations, file upload, form validation, session persistence, and API/network response checks.
- Log and triage bugs and tickets in DoneDone against agreed SLAs, coordinating staging changes and go-live timing with the team.
- Run security scans with Wapiti and ImmuniWeb, triaging findings by severity and tracking fixes.
- Built Python automation bots that run predefined QA checks and return results by direct message, reducing repeated manual testing time.
- Write user guides, technical documentation, and API documentation for clients and developers.

Wallero Technologies | US Technical Recruiter

Hyderabad, India | Mar 2023 to Dec 2023

- Built and managed relationships with US clients and candidates, coordinating interviews and communication over MS Teams.
- Supported and trained a team of six across IT and non-IT recruitment.

Springhead Technologies | US Technical Recruiter

Hyderabad, India | Mar 2021 to Feb 2023

- Managed hiring process for IT and non-IT roles across multiple industries.
- Trained and led a team of six, providing structured onboarding across IT and non-IT recruitment.

EDUCATION

University of Hertfordshire <i>MSc Advanced Computer Science</i>	Hatfield, UK Completed Mar 2026
Osmania University <i>BSc Computer Science</i>	Hyderabad, India Mar 2018 to Jun 2023
